ISHWAR SARADE

+91-7744953400 • ishwar.sarade@gmail.com • https://www.linkedin.com/in/heyIshwar • Mumbai, India • https://ishwar.dev

Product-focused **Full-Stack & AI Engineer** with **6 years of experience** architecting secure, **data-heavy web applications** and enterprise platforms. Specialized in the **MERN ecosystem, AWS cloud infrastructure, and AI engineering**. Proven track record of **driving "AI-readiness"** in enterprise products by designing **Retrieval-Augmented Generation (RAG) pipelines** and **MCP-based agents**. Strong background in end-to-end system ownership, automated testing, and leading cross-functional engineering teams to deliver high-quality, scalable software.

Skills

Languages & Frameworks: JavaScript, TypeScript, Node.js, Express.js, React.js, GraphQL

AI & Engineering: Retrieval-Augmented Generation (RAG), OpenAI API, Model Context Protocol (MCP), FastMCP, Agno, CrewAI

Frontend: React, MUI & Ant Design, Tailwind/Bootstrap, React Testing Library

Databases: PostgreSQL, MongoDB, MySQL

Cloud & DevOps: AWS (EC2, ECS, S3, Lambda, CloudFront, ALB, Route53, CloudWatch), Docker, Nginx, PM2

Testing & Tooling: Cypress (E2E), PyTest (API), Jest, GitLab CI/CD, Jenkins, Jira, Figma, Git

Experience

Privacera India Private Limited
Pune, India
Full Stack Developer
07/2024 - 06/2026

- **Spearheaded AI enablement** for enterprise data governance portals (built on Apache Ranger) by architecting robust **Retrieval-Augmented Generation (RAG)** pipelines; and **authored AI-RAG Framework** for all the teams to develop agents upon.
- Designed and integrated **MCP-based agents using Agno** to enable context-aware React page navigation, automated policy generation from prompts, and **intelligent in-app user assistance.**
- Engineered scalable frontend features within a complex React monorepo, collaborating directly with platform services (Discovery & Encryption) to harden APIs and implement backend changes in Java Spring Boot.
- **Overhauled quality assurance by leading Cypress E2E automation** and establishing GitLab CI/CD pipelines, significantly reducing production regressions and sign off times, saving a day's work every time.
- Optimized PyTest-based API automation suites via advanced fixture design and selective runs, drastically cutting execution cycle times and stabilizing Jenkins build pipelines.

Mobile Programming India Private Limited
Pune, India
Full Stack Developer
12/2023 - 05/2024

- **Shootsta (enterprise video production platform):** built React/TypeScript features and GraphQL/Express services; added robust Jest + RTL tests; lint/formatting and PR reviews. Contributed to reducing project setup time **from 2 days to ~30 minutes** through fixes, UX polish, and workflow automation.
- **Delivered modules for an AI-assisted recruitment platform** with Express.js + ChatGPT integrations.
- Worked across multiple repositories/services without claiming microservices ownership/deployment.

Bitsmith Technologies Private Limited
Pune, India
Founder & Tech Lead
07/2020 - 12/2023

- Owned end-to-end build of **Bitsmith Classroom (ERP+LMS; admissions→audits)** and **Campus (student community)** on **MERN + AWS**; integrated **Jitsi** for live classes/meetings.
- Architected AWS backbone (**EC2, Auto Scaling, ALB, Elastic Beanstalk, API Gateway, S3, IAM, CloudFront, VPCs**) for high availability and scale; implemented **cost controls**, load testing, and performance tuning.
- Shipped media & safety features: **Cloudflare Stream** for short-video and **AWS Rekognition** for proactive content moderation.
- Built a reusable backend engine (**Passport auth, emailers, logging, ORM, utilities**) to accelerate delivery; led a cross-functional **React/Node/Flutter** team with sprints, code reviews, standards, and security practices (**periodic VAPT**, targeted refactors).

Personal Project

SPEAR — Law Enforcement Intelligence Platform

- **Impact:** Built and shipped a SaaS intelligence platform for Maharashtra Cyber Police (Washim District Only); prevented officer night shifts; faster criminal arrests.
- **AI Agents:** Architected the AI agent infrastructure on Agno using Gemini 3.1 Flash Lite (via OpenRouter), including a two-loop evaluation system (online feedback + offline regression) to continuously improve agent accuracy in production.
- **Backend & Data:** Built the core API on NodeJS + FastAPI with JWT auth middleware, Motor/MongoDB for multi-tenant RBAC and cross-collection join safety, and a LanceDB knowledge base for retrieval.
- **Telecom & Geospatial:** Engineered telecom parsing pipelines (IMEI/IMEISV differentiation, Cell-ID/LBS resolution, azimuth derivation, PTA TAC lookups) plus geofencing on Washim District GeoJSON boundary data with the Google Maps API for suspect-tracing workflows.
- **Mobile & Infra:** Built an Android SMS gateway with a WorkManager watchdog and dual-SIM emulation for delivery reliability; self-hosted production infra on AWS (EC2, Apache2, DocumentDB) behind Cloudflare with Let's Encrypt SSL.
- **Tech stack:** Agno, NodeJS + FastAPI, Motor/MongoDB, LanceDB, Gemini 3.1 Flash Lite, OpenRouter, AWS (EC2, DocumentDB), Cloudflare, Google Maps API, Android/WorkManager, GeoJSON.

Education

Smt. Kashibai Navale College of Engineering — Pune, India
Master of Business Administration (Marketing & Business Analytics) — 01/2022 - 10/2024

Government Law College — Mumbai, India
Diploma in Cyber Law — 01/2021 - 05/2021

Smt. Kashibai Navale College of Engineering — Pune, India
Bachelor of Engineering (Information Technology) — 08/2016 - 05/2020
